

Alla Vostra Mobile App Work Log - June 2, 2026 (Part 1)

Compiled summary for June 2, 2026 (Part 1) focused on mobile navigation/header behavior and backfilled June 1 commit records.
Generated on June 2, 2026.

Source Materials Processed

- Git commit history for June 1, 2026 and current main branch status.
- Existing local worklog naming conventions and output format.
- Current repository status and synchronization checks.

Current Baseline to Preserve

- Mobile app architecture remains Expo Router based with persistent AppHeader behavior managed from app/_layout.js.
- Screen navigation continues to rely on synchronized top-nav state and main-screen swipe behavior.
- Existing visual identity remains unchanged: Dream Avenue / TT Fors typography, cream base palette, orange bar accents.

Main Goals Worked Toward

- ```
- Stabilize and refine top-nav arrow spacing and alignment relative to centered
screen/link labels.
- Remove slight app-header whitespace artifacts and tighten vertical transitions
.

reserve smooth beha- Preserve smooth beha- Preserveons- Preserve smooth beha- Pr
eserve smooth ted-small vertical whitespace gap mistakenly appearing between the
top nav bar and the background1 png image in the app header.
```

## Validation and Repository Status

- Pull with tags from origin/main now completes successfully without bad-object errors.
- Local branch remains healthy and synchronized workflow is restored.
- Active development can continue on main with normal pull/push operations.

## Notes

- This document is June 2 Part 1 and follows existing Alla Vostra worklog naming and content conventions.
